Compact and HPL

ATHLON | CUBICLE AND WASHROOM COLLECTION

Cubicle and Locker Components:

- Partitions / Wall Panels
- Cubicle or Locker Doors
- Pilasters
- IPS Panels
- Shower Panelling
- Vanity Unit Panelling

Compact 12.7 mm. The ultimate material choice for the most demanding applications. High impact strength and water resistance.

Thin HPL 0.8 mm. Flexibility of edge design - Postformed or Square and use of different core substrates allows limitless design.

Thin HPL and Compact are made of:

≈70%
Paper

≈30%
Thermosetting
Resins

Excellent moisture resistance

Great impact resistance

Scratch and wear-resistant

Light fastness

Ease of maintenance and cleaning

Hygiene

Most important characteristics according to EN 438 classification for both Compact and HPL material.

Compact 12.7 mm

Decorative Paper

Black Core

Decorative Paper

Overlay (Only for printed decors)

Thin HPL 0.8 mm.

Overlay (Only for printed decors)

Decorative Paper

Kraft Paper

Cubicle Optimisation / DDA Regulations.

As market trends lead the way towards higher and deeper cubicle dimensions for privacy and general comfort, the Athlon Washroom Collection is a perfect specification choice for Architectural Interior Design and System Manufacturer specifications enabling high yield and minimal material waste from the raw material.

Access to Public Buildings:

Washroom specifications are affected by the Access to Public Buildings (2004) Disability Discrimination Act) in two distinct areas.

Cubicle dimensions for the disabled:

The Athlon Washroom Collection is manufactured as standard in very large format sheets facilitating compliance with the Act which specifies that there should be at least a 450mm gap between an in swinging toilet cubicle door and the adjacent toilet pan.

Visual awareness:

To assist the partially sighted visual contrasts between adjacent surfaces in a washroom environment is necessary. This contrast is measured by the Light Reflectance Value (LRV) of colours as noted in the product availability chart. To ensure adjacent surfaces such as doors and pilasters are easily detected, the Act specifies that there should be clear separation of 30 LRV points between the two surface colours.

Large format sheets allow greater yield with minimum material wastage

*2150mm is nominal as cutting tolerances will apply.

○ Please check availability.

The LRV shown in this table have been measured in the Arpa Industriale Laboratory, in accordance with EN 13721/04.

RAL, NCS & Pantone references are the nearest equivalents and should be verified visually.
Rehau Express closest stocked range.
ABS references on order only.

Greenguard - Indoor Air Quality - Guaranteed

The GREENGUARD Environmental Institute is an industry independent, third-party certification organization that qualifies products for low chemical emissions (VOC's).

Arpa high pressure laminates have been certified according to the GREENGUARD Indoor Air Quality Certification Program and the higher GREENGUARD Children & Schools Certification Program.
