Specification
The Tradeline high pressure decorative laminate surface is manufactured to EN438, and is inherently heat, moisture and UV resistant. The surface also provides protection from impact and is highly resistant to wear
12mm radius on front edge
The substrate is a high density chipboard manufactured to EN312 part 3 P2 grade
The front edge is sealed against moisture ingress with an injected hot melt wax
A resin impregnated foil is applied to the underside of the worksurface to offer moisture resistance
The rear edge is sealed against moisture ingress with an injected hot melt wax
Worktops are supplied with a half length laminate edging strip

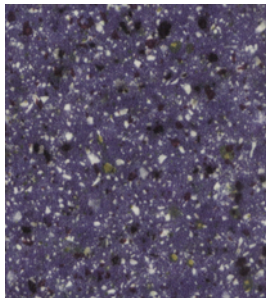

All prices shown exclude VAT at the current rate.

Warranty
Tradeline worktops use a high pressure laminate surface which is guaranteed to BS EN 438.

Cream Stone

Design code	4882
Also available ColorFill	CF29
Upstand	No
Splashback	No
Sheet laminate	Yes

Cleaning

A moist cloth is all that is usually needed to clean the worktop. More stubborn marks and grease can easily be removed with a little washing up liquid or, in the case of difficult to remove marks, methylated spirits can be used sparingly.

For further guidance please refer to the care leaflet supplied with each worktop.
