## Specification

The Duropol high pressure decorative laminate surface is manufactured to EN438, and is inherently heat, moisture and UV resistant. The surface also provides protection from impact and is highly resistant to wear

Classic profile (top) features a 6mm top/bottom corner radius, while the Quadra profile (bottom) features the tightest possible corner radius at 3mm to top and bottom

The substrate is a high density chipboard manufactured to EN312 part 3 P2 grade

The rear edge is sealed against moisture ingress with an injected hot melt wax

A resin impregnated foil is applied to the underside of the worksurface to offer moisture resistance

The decorative laminate is wrapped under the worktop to provide a drip barrier against water ingress

The front edge of the underside of the worksurface features a very neat and unique polyurethane seal set in a routed channel running the length of the worktop and which acts as an additional moisture barrier

## Duropol introduce their latest textured finish

Duropol have recently introduced their amazing Crystal Stone collection and these 6 new worktop designs (above) have now joined the other 67 Duropol worktop designs currently held in stock.

This new collection features a startling 3D textured surface quite unlike the traditional laminate work surface. Despite their sophisticated contemporary looks, the designs are both hardwearing and easy to maintain.

# Duropol

## Samples

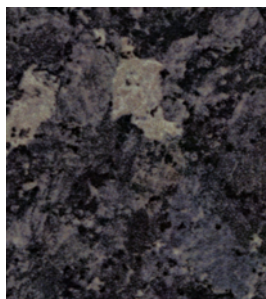

A5 samples of worktop laminates can be requested via our 24 hour faxline: 01625 617301. Alternatively, call 01625 660411 or order online at [www.pfleiderer.co.uk](http://www.pfleiderer.co.uk)

# Duropol

## Finishing touches

A select range of matching splashbacks and upstands is available for the perfect finish to your worktop, together with many other accessories.

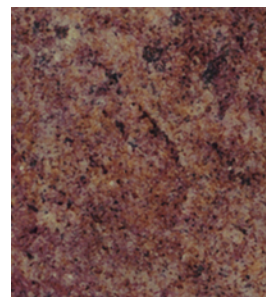

## Benefits

- 67 unique Duropol designs manufactured in Germany
- 40 designs in Classic profile with 6mm radius for a more traditional appearance
- 27 designs in the unique Quadra profile with 3mm radius giving a crisp contemporary appearance
- Enhanced gloss surfaces has improved abrasion resistance compared to standard gloss finishes
- The new Crystal Stone textures offer the touch and visual appeal of natural stone
- High gloss designs are available in 4100mm lengths
- Front edge profile is designed to prevent liquid spills entering drawers and cupboards
- All worktops are protected during transit with a thin polythene foil coating, which is easily removed on site
- Matching full length laminate edging strips are also available (see prices below), and should be ordered at the same time as the worktops

ColorFill	CF76
Upstand	No
Splashback	No
Sheet laminate	Yes

## Cleaning

A moist cloth is all that is usually needed to clean the worktop. More stubborn marks and grease can easily be removed with a little washing up liquid or, in the case of difficult to remove marks, methylated spirits can be used sparingly.

For further guidance please refer to the care leaflet supplied with each worktop.

## Gloss surfaces

Duropol gloss surface worktops have a special finish to offer enhanced wear and scuff resistance. However please be aware that gloss surfaces will tend to show marks and scratches more readily, so additional care should be exercised in handling, installation and during use.

**Note:** the manufacturer's warranty does not apply to gloss finishes.
