# Introduction

Total Cubicles is an innovative company dedicated to manufacturing and supplying architectural hardware to the construction markets.

Products offered include a broad range of door and toilet cubicle hardware predominantly in stainless steel.

Total Cubicles is also the sole UK and European distributor for Assa Abloy Asia Pacific (formerly Lockwood).

## Material

All products are manufactured from grade 304 stainless steel.

Standard grade 304 stainless steel is both strong and corrosion resistant. It is suitable for most applications.

Marine grade 316 stainless steel having better corrosion resistance is recommended for polluted, coastal or chloride environments such as swimming pools.

## Finish

SSS - Satin Stainless Steel (Brushed finish)  
PSS - Polished Stainless Steel (Mirror finish)

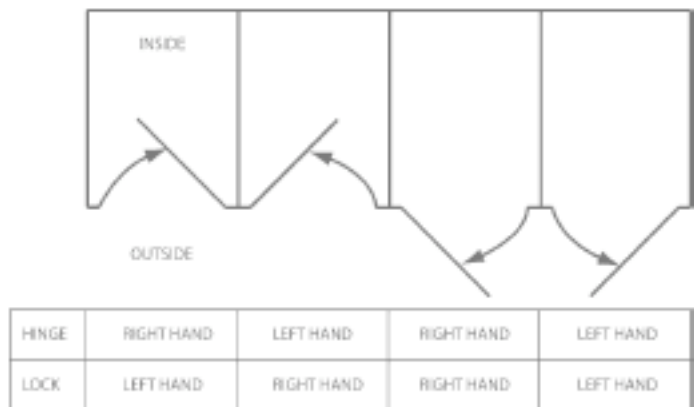

## Specials

Security fixings are available as an extra with most products.

Uniquely designed products not included in our standard range can be manufactured to customer's own specification.

## Handing

L/H - Left Hand  
R/H - Right hand

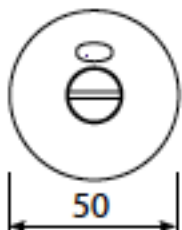

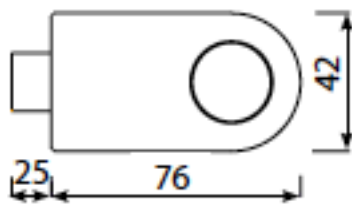

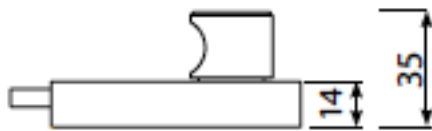

# Indicator Bolts

## T200 - Indicator Bolt

Suitable for 13mm and 20mm board  
Concealed bolt through fixings supplied

Keep supplied separately

- Deluxe Box Keep

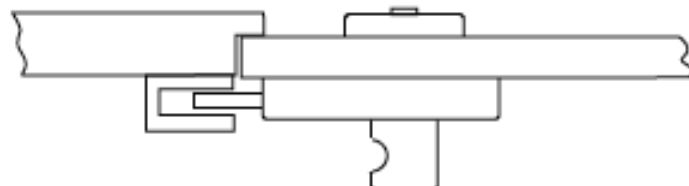

- open in door
- L Shaped Keep
- 8mm Buffer

- open out door
- U Shaped Keep
- 15mm Buffer

- Flush door
- U Shaped Keep

# General Information

## Guarantee

Total Cubicles guarantees their products against defects in workmanship and materials subject to fair wear and tear in standard atmospheric conditions for a period of 25 years.

Total Cubicles assumes no liability for:

- Improper installation or failure to follow fitting instructions.
- Improper maintenance or unfair wear and tear.
- Indirect or consequential loss or damage.
- Cost of removal and/or replacement.
- Cost of freight and/or travelling expenses.

Although our stainless steel products are suitable for most applications, neither grade 304 or 316 is unconditionally guaranteed and advice should be sought from one of our representatives.

## Care and Maintenance

To retain the highest corrosion resistance it is necessary to keep the surface of stainless steel clean. This can be done by wiping with a warm clean cloth using either a mild detergent or soap, then rinsing with warm clean water and drying with a towel. Carbon steel brushes or wire wool should not be used. Comprehensive instructions are available upon request.

## Change of Product Specifications

As a result of continuous improvements to our products, we reserve the right to alter standard product specifications and dimensions without prior notice.
