

## 'Catch' Out Vandals

With

**Burstcatch the Washroom anti vandal system.  
As seen in The Morning Advertiser, The Publican  
And The Scottish License Trade News.**

Burstcatch is the answer to the age old problem of your washroom cubicle doors being damaged by vandalism. Burstcatch replaces the original catch on your washroom cubicle doors. It still gives the same amount of privacy, because you can still push, bang, and even lean on the door without it opening, it's only when excessive force is applied with a kick or a shoulder barge, then and only then will Burstcatch release saving yet another costly repair bill.

Burstcatch is guaranteed to work fully automated for 1000's of releases with a full guarantee. There aren't any tools required to reset the catch, it's fully automatic in it's operation; just fit and forget.

Burstcatch is fitted to 100's of Pubs Clubs and Schools up and down the country, for the virtual demonstration plus case studies just log onto the web site. [www.Burstcatch.co.uk](http://www.Burstcatch.co.uk)

For the complete solution have Burstcatch fitted  
By an approved installer.

Call now on 0151 608 8666 for your  
Nearest Burstcatch approved installer.

Go online to find out more about Burstcatch  
or just call.
